# CHEMICAL-FREE HEAD LICE TREATMENT

علاج قمل الرأس  
خالي من المواد الكيميائية

- ✓ **Eliminates head lice & eggs**
- ✓ **Detects & prevents infestations**
- ✓ **As easy as combing with immediate visible results**
- ✓ **Allergen-free electrical combing device**

**Actual capture filter  
after treatment**

**V-COMB**

Designed in Australia  
Licence No. 153981  
Good Design Australia

I have tried many things to try and get rid of head lice and some were very expensive. On my first try with the V-Comb®, I could see how many head lice and eggs it extracted.

This product is stored at -15°C with an open vial stability of 7 days when stored at 2-8°C.

# Medintim

## Kessel Medintim GmbH

### Active 3 Erection System

Website [www.medintim.de](http://www.medintim.de)

The Active3® is a medical device for achieving an erection. The pump creates a vacuum in the cylinder around the penis. This draws blood into the shaft of the penis and causes it to swell and become erect. One of the con- striction rings is then slid down over the shaft of the penis. This prevents blood from flowing back out of the penis when the cylinder is removed and also maintains the erection. The thus obtained erection allows for normal and satisfying sexual intercourse. The Active3® can be easily cleaned and re-used. All parts, including the con- striction rings in four different sizes, can be reordered. The pump head (motor) comes with a 2-year guarantee. All parts are kept for re-use in the bag supplied. New Technology: silent, stronger and rechargeable.

## bon optics

### bon SIRIUS - 3D Rotating Scheimpflug Camera & Topography System

Website [www.bon.de](http://www.bon.de)

The Sirius – for optimal pre-refractive screening. The combination of the rotating Scheimpflug Camera and Placido for the ocular surface provides you with accurate, repeatable and comprehensive data for the anterior chamber and the corneal surface. Easy to use -Fast accurate, repeatable. What really sets Sirius apart from other devices is the ease of use. The Sirius Camera initiates immediately requiring just a 180° turn to deliver 360° coverage at the touch of a button. A single acquisition completed in seconds provides you with anterior segment data, angles, corneal and AC volumes, Pachymetry, white to white, Keratoconus screening, complete topographic values, Aberrometry etc.

**bon optics**

**bon ANTARES - The High-End Dry-Eye Topographer**  
Website [www.bon.de](http://www.bon.de)

Antares The state of the art Topography System for corneal mapping, contact lens fitting and dry eye diagnosis. A bright Star indeed. With its exceptionally large measurement zone and 24 analysis rings, Antares warrants detailed exams for optimal results each and every time. A choice of light sources provides a choice of diagnostics: a diffuse white light "TearScope like" imaging of the tear film for detailed tear film quality assessment, fluorescein images for lens fit simulation and Meibography with a classification software using the Infra red light source.

**bon optics**

**bon Slit Lamps - Classical & Digital**  
Website [www.bon.de](http://www.bon.de)

The excellent high resolution optics of the bon Slit Lamps have convinced thousands of Professionals worldwide for decades. The state of the art LED light source ensures perfect illumination for each and every examination. The brightness control is comfortably integrated into the slit lamp base - full control at your fingertips. The smooth mechanics of the base allow you single handed control. The diagnostic capability is enhanced by an integral yellow filter and the slit decoupling feature. The "Digi Pro" models with integrated high-end camera chip delivers photos and full screen live stream videos with unmatched clarity at the push of a button.

## INTRODUCING THE X SERIES® ADVANCED: ADVANCE YOUR CARE FOR EVERY RESCUE

Manage your patients more effectively than ever with ZOLL's new X Series Advanced monitor/defibrillator. X Series Advanced offers two groundbreaking new features:

**Real BVM Help™** provides real-time clinical feedback on manual ventilation, including delivered tidal volume and rate, a ventilation quality indicator, and a countdown timer.

**TBI Dashboard** enables care providers to effectively manage patients with traumatic brain injury. The dashboard combines trending of critical vital signs with real-time ventilation feedback in one comprehensive view.

## ToLife Technologies Australia

V-Comb®

Website [www.licetec.com.au](http://www.licetec.com.au)

The V-Comb® provides a solution to the head lice infestation problem, affecting millions of families all over the world. It is an allergen- and chemical-free treatment that eliminates head lice and eggs with the ease of combing the hair. With its suction force, the V-Comb® extracts head lice and eggs into the disposable capture filter housed within the device. A lid is provided to seal the filter for a hygienic and mess-free disposal. The capture filter compartment is also illuminated with a bright LED light, allowing for immediate visible results.

**STIEGELMEYER**

## Stieglmeyer GmbH & Co. KG

**Evario**

Website [www.stieglmeyer.com](http://www.stieglmeyer.com)

Thanks to its intelligent modular system, the Evario hospital bed is suitable for all types of wards. Various control options, safety side systems, castors, head and footboards are combined to create a flexible bed. Equipped with the new integrated scales, the bed is even more suitable for use in intensive care units. The clear design and optional machine-washable version add to the excellent hygiene properties of the Evario. This modern bed reduces the strain on staff, promotes the recovery of patients and, thanks to its high level of comfort and elegant appearance, improves the external perception of the hospital.

**STIEGELMEYER**

## Stieglmeyer GmbH & Co. KG

**Quado**

Website [www.stieglmeyer.com](http://www.stieglmeyer.com)

The new, slim-line Quado bedside cabinet is perfect for use in narrower hospital rooms. At the same time, it has a flexible design that provides users with plenty of space for storing belongings. Two compartments and a drawer can be accessed from both sides and can hold two 1½ litre drink bottles, for example. The optional lockable drawer is suitable for larger wallets and purses. The bedside cabinet is also very mobile. If a bed is moved to another room or ward, the lightweight Quado can simply be hooked onto the headboard of most Stieglmeyer hospital beds and transported along with the bed.

**STIEGELMEYER**

## Stieglmeyer GmbH & Co. KG

Libra

Website [www.stieglmeyer.com](http://www.stieglmeyer.com)

The Libra care bed offers a maximum of choice and flexibility and can be customised to the smallest detail. With attractive wood decors or fabric upholstery, it combines the comfort and elegance of a good hotel with the security of a home. It offers people in need of care protection and comfort while promoting mobility. Our innovative Vario Safe system plays an important part in this. With Vario Safe, you can remove and reinstall the split safety sides, the head and footboard and the side panels in a matter of seconds. This allows staff to meet the changing safety needs of the resident in every situation.

There is a difference between Safe... and Biodex Safe.

## Weiss Klimatechnik GmbH

### Hygienic air-conditioning for operating rooms

Website [www.weiss-technik.com](http://www.weiss-technik.com)

For perfect hygiene air-conditioning in operating theatres weisstechnik® MediClean offers a complete package consisting of Vindur® Laminar Flow operating theatre canopies, surgical smoke extraction systems, and Vindur CPM Continuous Particle Monitoring. Vindur Laminar Flow OT canopies create a reliably particle-free protective zone to isolate the wound area, the instrument tables and theatre personnel from the surroundings. During surgery, the surgical smoke extraction systems extract smoke directly at the wound, preventing its dispersal in the OT. Last but not least, the unique Vindur CPM monitors particles in real time and automatically adjusts the air flow in the air-conditioning ceiling.

## Weiss Klimatechnik GmbH

### Vindur TOP - the New Hygienic Splitunit - high filtering and self-disinfectant.

Website [www.weiss-technik.com](http://www.weiss-technik.com)

Vindur TOP is an innovative secondary air cooler unit meeting the high hygiene requirements for rooms occupied by people – e.g. patient, examination and recovery rooms in hospitals. It is an ideal additional or retrofit solution when the primary building air-conditioning is not adequately dimensioned in all rooms or additional cooling is required. Vindur TOP by weisstechnik® MediClean is equipped with two filter stages, easily accessible and simple to clean and maintain. Additionally, it offers an optional thermal disinfection system to further improve hygiene. This procedure effectively prevents the growth of microorganisms, such as bacteria and mould, in the air-conditioning unit.

spirit of excellence

## Richard Wolf GmbH

core nova

Website [www.richard-wolf.com](http://www.richard-wolf.com)

Richard Wolf understands what happens in the operating room (OR) and what is important. This information has enabled Richard Wolf to develop the core nova OR Integration System. core nova is versatile, user-friendly, integrated and consistently different. A function is only integrated in core nova if it can be applied intuitively and yields benefits in the operating room. In other words: core nova is the sum of all effective functions for an OR integration which knows about the things that really matter.

## Medifa x Integromed

Modular Room System

Website [www.integromed.de](http://www.integromed.de)

Complete modular solutions for hospital rooms from one stop-shop, including hygienic wall-, door- and ceiling-systems, cabinets and surgical equipment like operating tables. This is what the German cooperation between medifa and Integromed deliver in order to create outstanding environments in any healthcare facility. The prefabricated modular room system is available in a variety of materials and a wide range of design options and integrates state-of-the-art built-in elements, designed to meet the customers' requirements.

With five nuances as standard colours in the mediven® range, you can offer your customers a wonderfully natural collection.

**medi**

## medi GmbH & Co. KG

### mediven® Thrombexin

Website <https://www.medi.de/en/>

#### Clinical Compression

There are numerous indications for the use of compression in everyday clinical practice: These include prophylaxis and therapy of venous thromboses, prophylaxis and reduction of postoperative and posttraumatic oedema and haematomas as well as associated pain. For optimal treatment of these clinical pictures, the compression must be adapted to the respective indication, situation and mobility of the patient. For clinical use, medi offers compression stockings in three different strengths: light, medium and strong.

**medi**

## medi GmbH & Co. KG

### Lumbamed® plus

Website <https://www.medi.de/en/>

Lumbamed plus has a stabilising and relieving effect on the lumbar spine. Its compressive knitted fabric and the pad that is used also stimulate circulation and have a pain-relieving, massage effect without affecting the muscular force. Lumbamed plus has the greatest effect during physical exercise. In principal, the support can be worn all day. The special shape in the area of the groin (Comfort Zone) is decisive for the correct and comfortable fit of the support.

## medi GmbH & Co. KG

**Genumedi®**

Website <https://www.medi.de/en/>

The Genumedi® knee support is now noticeably soft to the touch, offering greater comfort whilst maintaining a secure hold. Thanks to new knitted fabric technology, reliable compression and clever features, the Genumedi is a tried-and-tested therapy for stabilising the knee and can effectively relieve pain and swelling. Featuring a new Comfort Zone with built-in ripple structure, the support now moves flexibly to follow any and all knee movements.

## MAVIG

### Portegra2 - Ceiling Suspension System for Medical Equipment

"Portegra2" – The worldwide standard for equipment support and radiation protection systems. The quality of MAVIG systems and their optimized design are proven for use in hospitals and radiological practices. The systems features: • Maximum load capacity up to 18 kg (39.7 lbs) for each suspension arm (dependent on length) • Steel extension / spring arms that ensure high stability • UL listing (IEC 60601-1, Edition 2, 3, and 3.1) and CE certification • Easy spring arm tension adjustment  
The Portegra2 system is the innovative solution for ceiling suspension and the protection of the head, eyes, thyroid gland, upper arms and extremities from radiation.

**MAVIG**  
**RA631 - Vest & Skirt X-Ray Allround Protection**

Vest & Skirt for Allround Protection: BALANCE RA631  
Allround optimum protection! ## PHYSIOMED®

TECHNOLOGY FOR THERAPY

## PHYSIOMED ELEKTROMEDIZIN AG

DEEP OSCILLATION® Personal

Website [www.physiomed.de](http://www.physiomed.de)

DEEP OSCILLATION® is a unique, patented therapy method. An above-average number of studies supports its medical effectiveness. Through the use of electrostatic attraction and friction, impulses cause the treated tissue to vibrate pleasantly with a deep biological effect. In contrast to other forms of therapy, these vibrations have an extremely gentle effect on all tissue components (skin, conductive tissue, subcutaneous fat tissue, muscles, blood and lymphatic vessels) up to a depth of 8 cm. DEEP OSCILLATION has been used successfully worldwide for three decades now. In some countries, this versatile therapy is already part of the medical gold standard.

Website [www.leaderhealthcaregroup.com](http://www.leaderhealthcaregroup.com)

The 3M™ SpotOn™ system is a non-invasive, accurate core temperature monitoring system that continuously measures patient temperature with an affordable single-use sensor. A single-use sensor is placed on the patient's forehead before surgery and is worn throughout the perioperative journey. The temperature is always displayed. A memory chip within the sensor allows a two hour continuous visual representation of the patient temperature trend on the control unit. The sensor stays on the patient, as it is disconnected from the sensor cable and reconnected at each point of care, eliminating the variability associated with clinician technique and use of multiple monitoring devices.

### Deluxe Scientific Surgico Pvt. Ltd.

**danumed Medizintechnik GmbH**  
**danuButton Premium Sets & Compact Sets**  
 Website [www.danumed.com](http://www.danumed.com)

The danuButton is a premium low-profile feeding tube for long-term enteral nutrition. It provides best comfort due to soft, flexible, medical grade silicone and a large selection of sizes and lengths for individual and perfect fit. The danuButton is available in two sets – the danuButton Premium Set and the danuButton Compact Set – with comprehensive accessories for easy and comfortable replacement, without any additional components needed. All components are latex-free, PVC-free, DEHP-free and BPA-free. Unique product features and a comprehensive range of related products like the danumed StomaStop, the danumed StomaMeter and the danumed Extension Sets, ensure best patient safety and highest patient comfort. A decision for the danuButton is a decision for more mobility and more quality of life through an innovative, high-quality product.

**danumed Medizintechnik GmbH**  
**Premium Enteral Feeding Products from an Innovative German Manufacturer**  
 Website [www.danumed.com](http://www.danumed.com)

danumed Medizintechnik GmbH is an innovative German medical technology company with the highest quality standards, many years of experience in enteral nutrition and a clear customer focus. danumed offers a full range of premium enteral feeding devices and accessories, which are all compliant with DIN EN ISO 80369 and equipped with ENFit® connectors to avoid tubing misconnections and to enhance patient safety significantly. All danumed products are subject to the highest quality requirements and many of the products are manufactured in Germany. danumed Medizintechnik GmbH – Individual solutions are our standard. Personal, competent, innovative.

**danumed Medizintechnik GmbH**  
**Innovative Features in Enteral Application Technology**  
Website [www.danumed.com](http://www.danumed.com)

danumed Medizintechnik permanently develops innovative product features in enteral application technology to improve safety and comfort for patients and users. ENSwivel stands for the innovative rotating ring from danumed Medizintechnik, which allows for easy connection and disconnection, of ENFit® devices. Since only the rotating ENSwivel is turned and not the entire connector, the twisting of the enteral tube, which is painful for the patient and inconvenient for the user, is completely avoided. All danumed Extension Sets with ENFit®, Y-ENFit® and Bolus-ENFit® connection offer the advantage of the ENSwivel. Another premium innovative feature of danumed enteral products is the danumed Stopcock that replaces the usual Y-port. Additionally, all danumed ENFit® connectors are made of Tritan™, a premium plastic material which is highly resistant to aggressive solutions and medicines.

# Evario and Quado

## Innovative products for every hospital

Thanks to its intelligent modular system the hospital bed Evario is suited for all units. Different control options, safety side systems, castors, head and footboards and optionally integrated scales create a functional and aesthetically flexible bed. The narrow bedside cabinet Quado is a real compact miracle. With its practical functions, it is particularly suitable for the everyday routines in hospitals.

- Evario usable on general wards and ICUs as well as in premium rooms
- Quado with storage space in two open compartments and a pull-out drawer on both sides
- Overbed table can be folded down in a simple and damped way
- Quado can be transported together with Stieglmeyer beds such as Evario by attaching it to the head or footboard

### ► Who we are

MAVIG GmbH has been successful worldwide as an independent research and manufacturing company for over 95 years.

MAVIG products stand for quality, durability and reliability, Made in Germany.

MAVIG's product range comprises above and below table devices to protect against scattered radiation, mobile protective shields, ceiling suspension systems for monitors and lights, radiation protective windows and curtains, as well as radiation protective clothing and accessories.

### ► What we do

All MAVIG products are designed, manufactured, and distributed in strict observance of the international regulations and standards - in many cases, higher than internationally accepted minimal standards.

Thus, from one source, you are able to obtain all recommended products optimally designed to work with one another for their applications.
